VALUATION APPROACH & METHODOLOGY

Valuation Base: Valuation base means the indication of the type of value being used in an engagement. Different Valuation bases may lead to different conclusions of value. Considering the nature of this exercise, we have adopted Relative Value as the Valuation base.

Premise of Value: Premise of Value refers to the conditions and circumstances how an asset is deployed. Considering the nature of this exercise, we have adopted 'Going Concern' Value as the Premise of Value.

Intended Users: This Report is intended for consumption of the Board of Directors of WCL and WSL and may be submitted to the shareholders of WCL and WSL and relevant regulatory and judicial authorities as may be mandatorily required under the laws of India, in connection with the Proposed Transaction.

It should be understood that the valuation of any entity or business is inherently subjective and is subject to uncertainties and contingencies, all of which are difficult to predict and are beyond our control. In performing our analysis, we have relied on explanations provided by the Management and have made assumptions with respect to industry performance and general business and economic conditions, many of which are beyond the control of the companies. This valuation could fluctuate with the passage of time, changes in prevailing market conditions and prospects, industry performance and general business and economic conditions financial and otherwise, of the companies, and other factors which generally influence the valuation of companies and their assets.

Commonly accepted approach/ methods for determining the value of the equity shares of a company/ business, include:

- Income Approach – Discounted Cash Flow method
- Market Approach
- Asset Approach – Net Asset Value method

There are several commonly used and accepted methods, within the market approach, income approach and asset approach, for determining the Share Entitlement Ratio, which have been considered in the present case, to the extent relevant and applicable, and subject to the availability of detailed information.

Income Approach – Discounted Cash Flow ("DCF")

Income approach is a valuation approach that converts maintainable or future amounts (e.g., cash flows or income and expenses) to a single current (i.e., discounted or capitalized) amount.

RBSA Valuation Advisors LLP

VALUATION | INVESTMENT BANKING | RESTRUCTURING | ADVISORY SERVICES
TRANSACTION SERVICES | TRANSACTION TAX

Under the DCF method the projected free cash flows to the firm are discounted at the weighted average cost of capital. This method is used to determine the present value of a business on a going concern assumption and recognizes the time value of money by discounting the free cash flows for the explicit forecast period and the perpetuity value at an appropriate discount factor. The terminal value represents the total value of the available cash flow for all periods subsequent to the horizon period. The terminal value of the business at the end of the horizon period is estimated, discounted to its present value equivalent, and added to the present value of the available cash flow to estimate the value of the business.

Such DCF analysis involves determining the following:

- Estimating future free cash flows: Free cash flows are the cash flows expected to be generated by the company/ asset that are available to the providers of the company's capital – both debt and equity.
- Appropriate discount rate to be applied to cash flows i.e., the cost of capital: This discount rate, which is applied to the free cash flows, should reflect the opportunity cost to all the capital providers (namely shareholders and creditors), weighted by their relative contribution to the total capital of the company. The opportunity cost to the capital provider equals the rate of return the capital provider expects to earn on other investments of equivalent risk.

Market Approach

Market approach is a valuation approach that uses prices and other relevant information generated by market transactions involving identical or comparable (i.e., similar) assets, liabilities or a group of assets and liabilities, such as a business.

Market Price Method:

Under this method, the value of shares of a company is determined by taking the average of the market capitalization of the equity shares of such companies as quoted on a recognized stock exchange over reasonable periods of time where such quotations are arising from the shares being regularly and freely traded in an active market, subject to the element of speculative support that may be inbuilt in the market price.

Comparable Companies Multiple (CCM) Method:

Under this method, the value of the shares / business of a company is estimated by applying the derived market multiple based on market quotations of comparable public / listed companies, in an active market, possessing attributes similar to the business of such company - to the relevant financial parameter of the company / business (based on past and / or projected working results) after making adjustments to the derived multiples on account of dissimilarities with the comparable companies and the strengths, weaknesses and other factors peculiar to the company being valued. These valuations are based on the principle that such market valuations, taking place between informed buyers and informed sellers, incorporate all factors relevant to valuation. Relevant multiples need to be chosen carefully and adjusted for differences between the circumstances.

Comparable Transaction Multiple (CTM) Method

Under Comparable Transaction Method, the value of shares / business of a company is determined

RBSA Valuation Advisors LLP

VALUATION | INVESTMENT BANKING | RESTRUCTURING | ADVISORY SERVICES
TRANSACTION SERVICES | TRANSACTION TAX

based on market multiples of publicly disclosed transactions in the similar space as that of the subject company. Multiples are generally based on data from recent transactions in a comparable sector, but with appropriate adjustment after consideration has been given to the specific characteristics of the business being valued.

Asset Approach

The asset-based valuation technique is based on the value of the underlying net assets of the business, either on a book value basis or realizable value basis or replacement cost basis. A net asset methodology is most applicable for businesses where the value lies in its underlying assets and not in the ongoing operations of the business.

Valuation Approach/ methodology adopted

Valuation of the Demerged Undertaking of WSL has been carried out on a 'sum of the parts' basis considering *inter-alia* valuation of WSL Steel Business and WSL's equity stake in WSL Investee Companies.

Valuation of WSL Steel Business

Valuation of WSL Steel Business is carried out on a 'going concern' premise. WSL Steel Business is expected to make profits in the near to medium term. The historical net asset value of the WSL Steel Business may not be representative of their earning potential. Accordingly, Asset Approach has not been adopted for the valuation of the WSL Steel Business.

Equity shares of WSL are not listed on any stock exchanges. Accordingly, Market price method is not adopted. Valuation of WSL Steel Business therefore has been carried out adopting a combination of Income approach (Discounted cash flow method) and Market Approach (Comparable Companies Multiple method).

Valuation of WSL Investee Companies

Valuation of WSL Investee Companies is carried out on a 'going concern' premise. WSL Investee Companies are expected to make profits in the near to medium term. The historical net asset value of WSL Investee Companies may not be representative of their earning potential. Accordingly, Asset Approach has not been adopted for the valuation of WSL Investee Companies.

- Valuation of WSSL has been carried out adopting a combination of Income approach (Discounted cash flow method) and Market Approach (Comparable Companies Multiple method and Market Price Method).
- Considering that ECGPL has finite life, valuation of WCGPL has been carried out adopting Income approach (Discounted cash flow method).
- Considering that ATMT has been recently incorporated and in absence of business plan, valuation of ATMT has been carried out using underlying Asset Approach (Net Asset Method).

Valuation of CRPS

CRPS of WCL are not listed on any stock exchanges. Further, CRPS issued by the other companies may not be comparable with the CRPS of WCL in terms of the coupon rate, tenor, credit rating, etc. Accordingly, the valuation of CRPS of WCL has been carried out adopting the income approach considering *inter-alia* the coupon rate, tenor, credit rating of WCL and other factors.

BASIS OF FAIR SHARE ENTITLEMENT RATIO

The basis of demerger of the Demerged Undertaking of WSL into WCL would have to be determined after taking into consideration all the factors and methodologies mentioned hereinabove. Though different values have been arrived at under each of the above methodologies, for the purposes of recommending a Share Entitlement Ratio, it is necessary to arrive at a single value for the Demerged Undertaking of WSL and CRPS of WCL. It is however important to note that in doing so we are not attempting to arrive at the absolute values but at their relative values to facilitate the determination of a Share Entitlement Ratio. For this purpose, it is necessary to give appropriate weights to the values arrived at under each methodology.

The Share Entitlement Ratio has been arrived at on the basis of a relative valuation based on the various approaches/ methods explained herein earlier and various qualitative factors relevant to each company and the business dynamics and growth potential of the businesses, having regard to information base, key underlying assumptions, and limitations.

We have independently applied valuation methodologies discussed herein above as appropriate and arrived at the value per share of the Demerged Undertaking and at the value per share of CRPS. To arrive at the consensus on the Share Entitlement Ratio for the proposed demerger, suitable minor adjustments/ rounding off have been done.

The computation of the Share Entitlement Ratio is as under:

Valuation Approach	Demerged Undertaking (A)		CRPS (B)	
	INR per share	Weight	INR per share	Weight
Market Approach: Comparable Companies Multiple Method	8.00	50%	NA	0%
Income Approach: Discounted Cash Flow Method	8.17	50%	10.00	100%
Asset Approach: Net Asset Value Method	11.47	0%	NA	0%
Relative Value per share	8.09	100%	10.00	100%
<i>Share Entitlement Ratio (A/B) (Rounded off)</i>	<i>0.81</i>			

NA: Not Applicable/ Not adopted

On the basis of the foregoing and on consideration of the relevant factors and circumstances as discussed and outlined herein above, we recommend the following Share Entitlement Ratio for the demerger of the Demerged Undertaking of WSL into WCL:

81 (Eighty-One) fully paid up Cumulative Redeemable Preference Shares of face Value of INR 10 each of Welspun Corp Limited for every **100 (One Hundred)** fully paid-up Equity Shares of face Value INR 10 each held in Welspun Steel Limited.

The Share Entitlement Ratio has been determined based on the capital structure of WSL as on the Report Date and the key terms of the CRPS proposed to be issued by WCL.

3. Data obtained

3.1 I have called for and obtained such data, information, etc. as were necessary for the purpose of this assignment, which have been, as far as possible, made available to me by the Management. **Appendix A** hereto broadly summarizes the data obtained.

3.2 For the purpose of this assignment, I have relied on such data summarized in the said Appendix and other related information and explanations provided to me in this regard.

4. Approach to Valuation

- 4.1 It is universally recognized that valuation is not an exact science and that estimating values necessarily involves selecting a method or an approach that is suitable for the purpose.
- 4.2 It may be noted that the Institute of Chartered Accountants of India (ICAI) on June 10, 2018 has issued the ICAI Valuation Standards (“IVS”) effective for all the valuation reports issued on or after July 1, 2018. The IVS is mandatory for a valuation done under the Companies Act, 2013, and recommendatory for valuation carried out under other statutes/ requirements. I have given due cognizance to the same in carrying out the valuation exercise.
- 4.3 For the purpose of arriving at the valuation, I have considered the valuation base as ‘Fair Value’. My valuation, and this Report, is based on the premise of ‘going concern’. Any change in the valuation base, or the premise could have a significant impact on the valuation exercise, and therefore, this Report.
- 4.4 IVS 301 on Business Valuations deals with valuation of a business and business ownership interest (i.e. it includes valuation of shares).
- 4.5 IVS 301 specifies that generally, the following three approaches for valuation of business/business ownership interest are used:

4.5.1 Market Approach

- 4.5.1.1 Market approach is a valuation approach that uses prices and other relevant information generated by market transactions involving identical or comparable (i.e., similar) assets, liabilities or a group of assets and liabilities. The common methodologies under the Market Approach are as under.

4.5.1.1.1 Market Price Method:

This method involves determining the market price of an entity based on its traded price on the stock exchange over a reasonable period of time.

4.5.1.1.2 Comparable Companies Multiple Method (“CCM”):

This method involves valuing an asset based on market multiple of comparable companies as related to earnings, assets etc.

4.5.2 Income Approach

Income approach is a valuation approach that converts maintainable future amounts (e.g., cash flows or income and expenses) to a single current (i.e., discounted or capitalised) amount. An approach based on earnings is relevant in case of companies generating a steady stream of income. The steel industry is observed to be cyclical in nature. The projections of WSL and WSSL as provided have not been adjusted for this cyclicity. Hence, I have not relied on the Discounted Free Cash Flow approach.

4.5.3 Cost Approach

Cost Approach is a valuation approach that reflects the amount that would be required currently to replace the service capacity of an assets (often referred to as current replacement cost). This approach is relevant in looking at value of capital-intensive businesses.

- 4.6 The Transaction involves Demerger by WSL of its Steel Business including investment in equity shares of WSSL and WCPGL into WCL. Against such demerger, WCL would allot 6% Cumulative Redeemable preference shares at par to the shareholders of WSL. I have, therefore, determined value of WSL attributed to Demerged Undertaking based on sum of the parts (“SOTP”) approach, so as to determine the fair ratio of allotment for this transaction.
- 4.7 Under SOTP for the Demerged Undertaking I have recognised the following parts
- 4.7.1. Steel Business comprised in WSL involving manufacture of steel (“Steel Business of WSL”)
- 4.7.2. Investment in WSSL
- 4.7.3. Investment in Welspun Captive power generation limited being used for captive power consumption in the Steel Business of WSL.
- 4.8 For WCPGL I have relied on the fair valuation report dated May 21, 2021 obtained by the Management from TPG & Co.
- 4.9 Each of the above part is valued separately and added up to determine the fair value of the Steel Undertaking.
- 4.10 For determination of value of each of the part of the Demerged Undertaking, I have used the examined the applicability of the methods listed in para 4.5 above. I discuss below the approach to valuation adopted for each part.
- 4.11 Valuation of Steel Business of WSL**

4.11.1 Market Approach:

4.11.1.1 Market Price Method

The equity shares of WSL are not listed on any stock exchange. Further, the transaction involves demerger of an undertaking out of the company. As the shares of the company undergoing the demerger are not listed there is no market price reflection available for the same. Therefore, this method is not used for determination of the value of the demerging undertaking of WSL.

4.11.1.2 Under CCM Method

WSL is a company which is in the business of manufacture of steel billets and has had a track record of profits. Hence, I have followed the undermentioned steps to derive the value of Steel Undertaking of WSL under CCM.

4.11.1.2.1 **Value based on Historic EV/ EBITDA Multiple Method**

The broad steps followed to derive the value based on forward Earning Before Interest Depreciation Tax and Amortisations (“EBITDA”), are mentioned hereunder:

- For the purpose of arriving at the value under this method I have considered the financial statements of WSL for the year ended March 31, 2021.

- Under this method, I have considered the profit before tax of the Company for the year ended March 31, 2021, adjusted for non-operating and non-recurring expenses/incomes, interest, depreciation, tax and amortisation in order to arrive at Adjusted EBIDTA.
- Calculated the Enterprise Value ("EV") of companies in similar line of business comparable to the business being valued, hereinafter referred to as Comparable Companies by adding the amount of debt and preference capital as applicable to their respective Adjusted Market Capitalization considering their market price based on Weighted Average Price ("WAP") over a period of three months ended the Valuation date. Also computed adjusted EBIDTA for these companies to derive EV/EBIDTA Multiples for the Comparable Companies.
- I observed in case of some of the well tracked Comparable Companies that there is an expectation of decline in EBIDTA per tonne in the year 2023 over the earlier year. Despite such decline there is a strong growth momentum seen in those companies. This trend was not observed in WSL. Since, earnings multiples of Comparable Companies would have built in such growth expectation, I have discounted the EV/EBIDTA multiple of the Comparable Companies by 20%.
- The EBIDTA of WSL as computed above is then multiplied by such discounted EV/EBIDTA Multiple to obtain EV of the Steel Business as at the Valuation Date.
- The EV so arrived at above is increased by the realizable amount of non-operating cash and bank balances and reduced by the amount of borrowings, to arrive at the Business value/Equity value. It is understood from the Management that none of the contingent liabilities are expected to crystallise. Therefore, no reduction is made for the same.

4.11.2 Cost Approach

It may be noted that the Steel Business is capital intensive. For arriving at the value under this approach I have considered the value of assets based on their reflection in the Balance Sheet of WSL as on March 31, 2021.

However, in the final valuation, due cognizance is given to the fact that, in going concern valuation, earnings potential would be more relevant for determining its value.

4.11.3 Fair valuation of Steel Business of WSL:

I have arrived at the fair value of the steel undertaking of WSL by applying 66.67% weight to the comparable company multiple Method and 33.33% weight to the Net asset value method. Under comparable company multiple method fair value is arrived at using EV/EBITDA method.

4.12 Valuation of Investment in WSSL

4.12.1 Under Market Approach:

4.12.1.1 Market Price Method

Insofar as valuation of WSSL is concerned, as stated in para 2.4.2, its equity shares are listed on BSE. Therefore, I have determined the market price of WSSL based on Weighted Average Price ("WAP") over a period of three months ended the Valuation date. It may be noted that the shares of the WSSL are thinly traded.

4.12.1.2 Under CCM Method

I have observed that WSSL has incurred losses in the past. However, the Management proposes to revamp the products and focus only on higher margin products, for which it has already set up the capacity. I have, therefore, considered the forward outlook for WSSL to capture its value. I have followed the following steps to derive the value of the equity shares WSSL under CCM Method.

Value based on Forward EV/ EBITDA Multiple Method

- For the purpose of arriving at the value under this method I have considered the projected financial statements of WSSL for the period ended March 31, 2023.
- Computed the forward EV/EBIDTA Multiple for the Comparable Companies.
- The EBIDTA of WSSL as computed above is then multiplied by such forward EV/EBIDTA Multiple and the value thus obtained is the Enterprise Value of WSSL as at the Valuation Date.
- The Enterprise Value so arrived at above is increased by the realizable amount of non-operating cash and bank balances and reduced by the amount of borrowings, fair value of 12% Non-Cumulative Preference Shares so as to arrive at the Business value/Equity value as at the Valuation Date. It is understood from the Management that none of the contingent liabilities are expected to crystallise. Therefore, no adjustment is made for the same.
- I have divided such Business Value arrived above by the number of fully paid, issued and subscribed equity shares of WSSL as at the Valuation Date to arrive at the value per share under the Forward EV/ EBITDA Multiple Method.

4.12.2 Cost Approach

WSSL is engaged in asset intensive business. Therefore, this approach would achieve primary importance. However, the company has suffered losses in the past which were funded by debt, which brought down the asset base of the company. Further, in a going concern scenario, the relative earning power, as reflected under the Earnings based and Market approaches, is of greater importance to the basis of amalgamation / arrangement,

with the values arrived at on the net asset basis being of limited relevance. Therefore, I have not used the Cost Approach for valuation of WSSL for this valuation.

4.12.3 Fair Valuation of WSSL:

Considering that the shares of WSSL are thinly traded I have given lower weight to the value arrived at under the Market Price Method. I have arrived at the fair value per share of the WSSL by applying 85% weight to the value arrived at under the CCM Method and 15% weight to the value under the Market price method.

4.13 Sum of the parts value of WSL

The fair value of the Demerged Undertaking is arrived at by adding the value of the 50.03% holding of WSL in WSSL and 2.95% holding of WSL in WCPGL to the value of Steel Business of WSL under each of the approaches adopted.

I have divided the fair value of the Demerged undertaking by the face value of the 6% cumulative redeemable preference shares to be issued by WCL to arrive at the total number of shares to be issued. This is divided by the total issued equity shares of WSL to calculate the fair allotment ratio.

Approach	Weights	Total Business Value (INR in Crores)	
<u>Market Approach</u>			330.36
Comparable Companies Multiple Method			
Based on EBITDA	66.67%	330.36	
<u>Cost Approach</u>			421.11
Net Asset Value Method	33.33%	421.11	
Total	<u>100%</u>		
Business Value as at Valuation Date			360.61

5 Conclusion

Based on the foregoing, in my opinion the ratio of allotment of preference shares in WCL is: for every 1 equity share of Face Value Rs.10 held in WSL 0.81, 6% Cumulative Redeemable Preference Share of Face Value of Rs.10 each in WCL.

markets and product offerings. Further, the operations of the Demerged Undertaking could have access to the Resulting Company's marketing capabilities.

- Greater economies of scale and will provide a larger and stronger base for potential future growth;
- Consolidation and simplification of the group structure;
- reduction in overheads, administrative, managerial and other expenditure;
- operational rationalization and increase in operating efficiency; and
- synergistic benefits, expansion and acquisition opportunities

IV. VALUER'S RECOMMENDATION

As per the Valuation Reports of Valuers, it is quoted

"On the basis of the foregoing and on consideration of all the relevant factors and circumstances as discussed and outlined herein above, we recommend the following Fair Share Entitlement Ratio for the demerger of Steel Business Undertaking of WSL into WCL:

81 (Eighty one) fully paid up Cumulative Redeemable Preference Shares of face Value of INR 10 each of Welspun Corp Limited for every 100 (One hundred) fully paid-up Equity Shares of face Value INR 10 each held in Welspun Steel Limited"

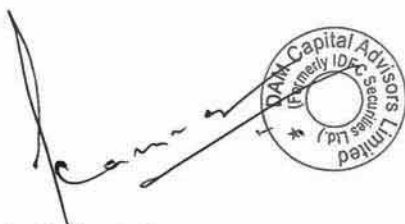

"Based on the foregoing, in my opinion the ratio of allotment of preference shares in WCL is: for every 1 equity share of Face Value Rs. 10 held in WSL 0.81, 6% Cumulative Redeemable Preference Share of Face Value of Rs.10 each in WCL"

Conclusion

Based on and subject to the foregoing, we are of the opinion that, as of the date hereof, Share Entitlement Ratio proposed by the Valuers in their Valuation Reports is fair to the equity shareholders of WCL, from a financial point of view.

Yours truly,

A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. This Statement, which is the responsibility of the Company’s Management and approved by the Board of Directors, has been prepared in accordance with the recognition and measurement principles laid down in Indian Accounting Standard 34 “Interim Financial Reporting” (“Ind AS 34”), prescribed under Section 133 of the Companies Act, 2013, and other accounting principles generally accepted in India. Our responsibility is to express a conclusion on the Statement based on our review.
3. We conducted our review of the Statement in accordance with the Standard on Review Engagements (SRE) 2410 “Review of Interim Financial Information Performed by the Independent Auditor of the Entity”, issued by the Institute of Chartered Accountants of India. This Standard requires that we plan and perform the review to obtain moderate assurance as to whether the Statement is free of material misstatement. A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.
4. Based on our review conducted as above, nothing has come to our attention that causes us to believe that the Statement has not been prepared in all material respects in accordance with the recognition and measurement principles laid down in the aforesaid Indian Accounting Standard and other accounting principles generally accepted in India and has not disclosed the information required to be disclosed in terms of Regulation 33 of the Listing Regulations, 2015 including the manner in which it is to be disclosed, or that it contains any material misstatement.
